# Qphone™

Privacy Made Simple

Qphone™ is a highly secure communications app that provides encrypted, end-to-end voice, video, and messaging. It seamlessly integrates quantum resistant encryption, ensuring all your communications are highly secure and impervious to eavesdropping.

Qphone™ Features

- Available for IOS, Android, Windows, MacOS, and Linux

- Voice / Video communications are protected end-to-end. There is no way to eavesdrop on any communications using Qphone

- Messages are protected, including attachments (documents, videos, etc.)

- Designed to defeat man-in-the-middle attacks, screen scraping, side loading, etc.

- Our patented quantum resistant implementation protects Qphone from sophisticated attacks

- Built in meeting scheduler

- Qphone users can make text messages or group chats disappear after being read, or at a predetermined date or time

- Each customer organization has their own private installation of encryption that ensures isolation of their data from any third party

- Replace email with real-time messaging (with attachments) for internal communications

Qphone

Ensuring Your privacy

Law Firms
For the first time client attorney communications, as well as inter-firm communications are truly private

Executive or Close Protection
Instant messaging and calls between team members or with clients are highly secured providing unprecedented privacy

Legal and Cyber Services
The confidentiality and integrity of investigations are protected from outsiders or prying third parties

Executive Suites
Protect the communication of executives, whether day to day operations or board meetings from any third parties

Intellectual Property
Make sure your intellectual property remains protected. Whether development of pharmaceuticals, high tech, or business plans, keep your information safe.

Corporate Espionage
Protect the privacy of your communications from being monitored by any unauthorized third parties.
